CALIFORNIA ELECTRIC VEHICLE INFRASTRUCTURE PROJECT

Eligible Equipment List

CALeVIP.org
CALeVIP Eligible Equipment List – November 2020

DISCLAIMER

The Center for Sustainable Energy and the California Energy Commission are not endorsing the EV charger companies or chargers in this document. The EV chargers listed below meet the minimum eligibility requirements for CALeVIP and have been submitted by their manufacturer for eligibility listing. Charger stock availability is based on each respective company and is not guaranteed by CALeVIP.

The EV charger(s) must meet these requirements.

LEVEL 2 CHARGERS

Be new equipment installing for the first time, installing on a wall or pedestal mounting at the corresponding site address. Resale units, rebuilt, rented, received from warranty insurance claims, won as a prize or new parts installed in existing units do not qualify.

Utilize the SAE J1772 charging connector.

Be networked, which is defined as a charger connected to a back-end network operations center.

Be capable of delivering electricity to a plug-in electric vehicle at a minimum rate of 6.2 kilowatts (kW).

DC FAST CHARGERS

New EV charging equipment.

Include DCFC dual standard chargers with both CHAdeMO and SAE CCS connector options.

Networked: Equipment and network must have remote diagnostics and be capable of “remote start.” Must also be capable of usage data collection. Minimum five-year networking agreement (eligible towards total project cost).

Capable of 50 kW or greater.

If payment is required, must accept some form of credit cards and multiple forms of payment.

Be approved by a NRTL program for EVSE testing and certification.

Rebates for Level 2 EV chargers and DC fast chargers vary by project. For details on rebate amounts, visit CALeVIP.org/find-project and select a specific incentive project.

All equipment descriptions are provided by the manufacturers.
LEVEL 2 CHARGERS
IQ 200

Super fast, networked Level 2 charging station. Capable of being installed on 40 amps to 100 amps, with 80 percent output at the plug.

DC FAST CHARGERS

50–99.9 kW
ABB Terra 54 CJ, HV

The Terra 54 is a 50 kW DC fast charger with CCS and CHAdeMO dual-outlets. ABB’s 4G modem-connected chargers feature a 5x10kW redundant power module architecture for high uptime and remote serviceability – with a high-brightness color touchscreen display, RFID and support for OCPP 1.6 integrations. Other options include cable management, credit card reader and more. HV model capable of 920VDC output. CJ model capable of 480-500VDC output.

- **POWER OUTPUT:** 50 kW
